

INGREDIENT GLOSSARY

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
Acai Oil	Euterpe Oleracea (Acai) Fruit Oil	Oil expressed from the Acai berry. Extremely high in antioxidants, anthocyanins, vitamins and minerals. (Vitamin C, B1, B2, B3, iron, potassium and calcium).	Deeply hydrating to skin and hair due to beneficial omegas. Antioxidants preserve connective tissues like collagen.
Acacia Gum	Acacia Senegal Gum	Edible hardened sap of the acacia tree.	Gum which thickens and reduces the surface tension of liquids, making it feel excellent on both hair and skin. Especially useful in hair spray as film former.
Agave	Agave Americana Leaf Extract	A natural sweetener derived from the agave plant. Used as an alternative to sugar, it has a low glycerin index.	Traditionally used by Aztecs to treat wounds. Thought to be immune-boosting and helpful in blood sugar regulation.
Alcohol	Alcohol Denat Grain Alcohol	Derived from the fermentation of certified organic corn. Used as a solvent for oils.	Has antibacterial properties, good for purifying personal environments as it evaporates faster than water.
Aloe Juice	Aloe Barbadensis Leaf Juice	Extract from a desert-growing succulent plant; beneficial vitamins, minerals, enzymes, amino acids and natural sugars, all of which are known to reduce inflammation.	Cools, calms and aids the body. Can be applied topically or consumed orally. Traditionally used to accelerate and aid in the healing of skin. Light film former which helps in the styling of hair.
Annatto	Bixa Orellana (Annatto) Seed Oil	A yellow to orange plant coloring used in foods and cosmetics that comes from the reddish pulp which surrounds the seed of the bixa/orellana shrub. Contains very high concentrations of carotenoids.	A versatile and stable plant alternative to synthetic colorants.
Apple Juice	Pyrus Malus (Apple) Juice and Malus Domestica (Apple) Fruit Juice	Juice from the pressing of apples. Nutritionally high in vitamin C and polyphenols (antioxidants).	Has a variety of essential nutrients and vitamins that aid in immunity.
Apricot Kernel Oil	Prunus Armeniaca (Apricot) Kernel Oil	Extracted from the kernel (pit) of an apricot, it contains oleic fatty acid (mono-unsaturated Omega-9) and Linoleic fatty acid (unsaturated Omega-6).	Used to improve scalp condition, condition hair and nourish skin.

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
Argan Oil	Argania Spinosa (Argan) Kernel Oil	Oil produced from the crushing of the kernels of the argan tree fruit. Contains more than 70% Oleic and linoleic acids. Rich in Vitamin E, phenols and carotenes.	Protects skin and hair from dryness - essential fatty acids provide nutrition to the body. Some research indicates it may be a treatment for psoriasis and may reduce sebum production on skin.
Avocado Oil	Persea Gratissima (Avocado) Oil	Pressed from the pulp surrounding the pit. Healthful ratio of saturated and unsaturated fats.	Softens skin; moisturizing and conditioning to skin and hair. Clinically observed to significantly increase the amount of collagen in the skin.
Baobab	Adansonia Digitata (Baobab) Oil	A vegetable from the African tree suggested to have the potential to improve nutrition, boost food security, foster rural development, and support sustainable land care.	Contains 50% more calcium than spinach, is high in antioxidants, and has three times the vitamin C of an orange. Has high antioxidant value with Anti-inflammatory, analgesic, antipyretic activity.
Beeswax	Beeswax/Cera Alba	Created by bees, this thick wax is the primary component of a honeycomb.	Helps to build volume and thickness and seal in moisture in hair, while it helps to smooth and moisturize lips and skin.
Behentrimonium Chloride	Behentrimonium Chloride	Rapeseed-based antistatic conditioning ingredient.	Provides nourishment to hair; tames frizz and split ends.
Behenyl Alcohol	Behenyl Alcohol	Rapeseed-derived fatty alcohol used to thicken and help emulsify oils.	Helps to build the emulsion and aids in spreadability throughout hair.
Benzyl Alcohol	Benzyl Alcohol	Benzyl alcohol is produced naturally by many plants and is commonly found in fruits and teas and in a variety of essential oils including jasmine, hyacinth, and ylang-ylang.	It is often used as a preservative due to its bacteriostatic and antipruritic properties.
Biosaccharide Gum	Biosaccharide Gum	Made by fermenting plants.	A moisturizing and skin-soothing ingredient. It works by binding water to the epidermis, and creating a moisture-binding film on the skin that gives the skin a soft, smooth feeling and long-term moisturization.

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
Black Cumin Seed	Aqueous (Water/Aqua) Extracts: Nigella Sativa (Black Cumin) Seed	Intellimune Seed Meal Complex – the perfect companion to the antioxidants found in the Intellimune Seed Oil Complex. After the oil has been cold-pressed from the seeds, the water-soluble antioxidants (like polyphenols and flavonoids) are infused into this formula.	Protects against environmental aggressors. Provides nourishment to all types of hair and skin. Topical application of both oil and water antioxidants is overwhelmingly beneficial to skin.
Black Cumin Seed Oil	Nigella Sativa (Black Cumin) Seed Oil	Intellimune Seed Oil Complex – a powerful blend of high-antioxidant oils.	Protects against environmental aggressors. Provides nourishment to all types of hair and skin.
Brassica Alcohol (and) Brassicyl Isoleucinate Esylate	Brassica Alcohol (and) Brassicyl Isoleucinate Esylate	Derived solely from fermentation and plant materials using sustainable green chemistry principals.	For hair this is an excellent plant based anti-static agent. In skin care, it is an emulsifier with an entirely new sensory profile, providing a silky initial- feel and a powdery after-feel that are unmatched.
Brown Algae (Laminara Digitata)	Glycerin (and) Water (and) Hydrolized Algin	A concentrated solution of an oligosaccharide from the leathery, dark brown seaweed that grows to two or three meters	Helps calm balance, tone, reduce stinging and redness as it helps boost skin's natural repair processes.
Calophyllum Inophyllum (Tamanu) Seed Oil	Calophyllum Inophyllum (Tamanu) Seed Oil	Oil extracted from seeds gathered in Southeast Asia. High in antioxidants and beneficial to skin and hair.	Protects against environmental aggressors due to high level of antioxidants.
Caprylic/Capric Triglyceride	Caprylic/Capric Triglyceride	Naturally derived, highly emollient oil.	High emollient oil offers a non-slippery skin feel that is super moisturizing.
Carnauba Wax	Copernicia Cerifera (Carnauba) Wax/Cera Carnauba	Shiny wax that comes from palm leaves. Contains beneficial antioxidants. Sustainably sourced.	Film former, fixative and shine enhancer in hair care and skincare products.
Carrot Seed Oil	Daucus Carota Sativa	Carrot seed oil is mainly obtained from wild carrots. It is an annual or biennial herb with hairy leaves and umbels of white lacy flowers with purple centers.	Carrot seed oil contains carotene and vitamin A, it is also very good for healthy skin, hair, gums and teeth and is also associated with good eyesight. The formative action on the epidermal cells help to keep wrinkles at bay and is also helpful when fighting age spots.

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
Carob Bean	Ceratonia Siliqua (Carob Bean) Gum	Water-loving polysaccharide vegetable gum extracted from the seeds of the large evergreen Carob Tree. Also called Locust bean gum; used in food production.	A natural thickener and stabilizer used in cosmetic and food formulas.
Castor Oil	Castor Oil and Castor Seed Oil	Extracted from castor seeds; an oil with minimal smell and taste.	Ideal for use on the body – its low molecular weight allows it to be absorbed into the skin for a deeply softening and conditioning effect.
Cedarwood	Cedrus Atlantica		Insect repellent, Lipolytic (mobilizes fat cell and metabolism), Mucolytic, Antiviral, Circulatory stimulant.
Cetearyl Alcohol	Cetearyl Alcohol	A fatty alcohol found in plant cells.	Aides in the rich creamy feel of products.
Cetearyl Glucoside	Cetearyl Glucoside	Fatty alcohol derived from corn and coconut oil.	Helps skin and hair retain moisture leaving a velvety feel while providing a smooth product consistency.
Cetearyl Oliviate/ Sorbitan Oliviate	Cinnamomum Zeylacnicum Bark Oil	It is derived from olive oil, and combines the properties of olive oil with other naturally derived ingredients.	Helps deliver a desirable texture.
Cetyl Alcohol	Cetyl Alcohol	A fatty acid derived from vegetable oil.	It imparts emollient properties due to its absorption and retention in the epidermis where it lubricates and softens the skin. Aides in the creamy feel of the product.
Cinnamon Oil	Cinnamomum Zeylacnicum Bark Oil	Cinnamon has been used for culinary and medicinal purposes. Cinnamon has been a highly prized commodity since antiquity and is one of the most recognizable scents in the world.	Biblical oil, general tonic, antiviral, antiseptic, circulatory stimulant; counteracts enzyme deficiency in digestive tract, assist in intestinal infections, urinary infections, dental ailments; aphrodisiac; aids in blood sugar regulation. Also, considered a mild fixative. Known to have repellent properties.

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
Cistus	Cistus Ladaniferus Oil	It is a popular ornamental plant, grown for its strongly resin-scented foliage and conspicuous flowers. Its leaves yield a fragrant oleoresin known as labdanum.	Traditionally it has been used in ointments and compresses to treat infected wounds and skin ulcers. It is excellent for skin care (eczema and psoriasis as well as mature skin and wrinkles). It is also used as a fixative in colognes and perfumes with color fasting properties used our hair care.
Citric Acid	Citric Acid	Naturally found in citrus fruits such as lemons and limes. Contains vitamin C (an antioxidant) and has a high pH.	pH adjuster—added to formulas to maintain consistent pH.
Citronella	Cymbopogon Nardus		Properties: Insect repellent Controls sebum Anti-bacterial Anti-fungal Alleviates nervous exhaustion and fatigue
Clove Bud	Eugenia Caryophyllus		Properties: Insect repellent, Anti-inflammatory, Antiseptic and anti-microbial, Stimulates digestion, Wards off drowsiness, Used as local analgesic.
Cocoa Butter	Theobroma Cacao (Cocoa) Seed Butter	Fat extracted from cacao seeds. Contains polyphenols and other nutrients.	Highly concentrated; readily absorbs into skin to help in the creation of a moisture barrier.
Coco-glucoside	Coco-glucoside	A non-ionic gentle cleansing agent derived from the dried pulp of the coconut fruit and sugar.	This gentle cleansing agent is biodegradable, non-toxic, residue free and accepted by sensitive skins.
Coconut Oil	Cocos Nucifera (Coconut) Oil	Oil produced in the shredding/squeezing of the coconut kernel. Commonly used in cooking and in cosmetics rich in lauric acid, capric acid and caprylic acid.	Many health benefits; has been studied for proper digestion, improving metabolism and increasing immunity. Helps to soothe dry skin/scalp and mend split ends.
Coffee Oil	Coffee Arabica (Coffee) Seed Oil	Oil expressed from the crushing of coffee beans. High in antioxidants with a rich, nutty aroma.	High in antioxidants, which slow environmentally created free radicals. Helps to soften skin.

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
Coneflower	Echinacea Angustifolia (Coneflower) Meristem Cell Culture	Plant stem cells contribute to the growth and repair process. They contain the highest concentration of antioxidants (active substances/phenylpropanoids) and allow for the generation of new tissues and continuous growth. Extracts prepared from plant stem cells guarantee the highest quality, activity and purity for ingredients without the worry of weather, soil, herbicides, pesticides, fungicides, fertilizers, insect infection and other pollutants in the environment.	A proprietary process allowing for the selection of these plant stem cells in the lab without the use of soil contain at least 1,000 times the active antioxidant molecule concentrations as plants grown through conventional farming methods. Coneflower visibly improves skin texture and appearance by inhibiting hyaluronidase up to 90%.
Coralline Red Algae	Water (and) Corallina Officinalis Extract (and) Glycerin	A rock-like algae rich in minerals, magnesium, calcium, iron and zinc. Harvested in a sustainable manner without heating to ensure potency.	This great soother, restores, thin, sensitive skin. It strengthens fine capillaries, helps soothe redness associated with breakouts and roseacea, and irritation. Booster Effect: Reactivates skin's vital functions: moisturization, oxygenation and protection for a brighter, more uniform, smoother and more toned complexion.
Cranberry Seed	Vaccinium Macrocarpon (Cranberry) Seed	A component in the Intellimune® Seed Oil Complex.	Protects against environmental aggressors. Provides nourishment to all types of hair and skin.
Cranberry Seed Oil	Vaccinium Macrocarpon (Cranberry) Seed Oil	Intellimune® Seed Oil Complex – a powerful blend of high antioxidant oils	Protects against environmental aggressors. Provides nourishment to all types of hair and skin.
Cucumber Fruit Extract	Cucumis Sativus (Cucumber) Fruit Extract	Derived from cucumber, it is known for its soothing and astringent effect	Composed of 90% water (cooling action), amino acids, proteins, lipids, and vitamin C it serves as an antioxidant that helps soothe and relieve puffiness.
Cupuacu Seed Butter	Theobroma Grandiflorum (Cupuacu) Seed Butter	Pressed from the seeds of the cupuacu fruit from the cocoa like tree in Brazil. The butter is soft and creamy in consistency and does not contain caffeine like cocoa.	Offers exceptional moisturization for the skin and hair. Its level of water absorption is significantly higher than lanolin It is an effective ingredient to add shine to the hair.
Decyl Glucoside	Decyl Glucoside	Biodegradable, mild foaming	Creates foam which helps

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
		surfactant sourced from glucose and corn. Commonly used in baby shampoos.	to solubilize oils from hair and skin so they can be rinsed away. Leaves hair and skin feeling clean.
Decyl Oleate	Decyl Oleate	Plant-derived emollient containing proteins and vitamins.	Helps in the penetration of moisture into the hair and the skin, creating a smooth, soft feel.
Diheptyl Succinate (and) Capryloyl Glycerin/Sebacic Acid Copolymer OR Heptyl Undecylenate	Diheptyl Succinate (and) Capryloyl Glycerin/Sebacic Acid Copolymer OR Heptyl Undecylenate	Renewable and sustainable derivative of castor and plant oils that step in as a biodegradable alternative to silicone.	This Silicon replacement helps improve skin-feel and enhances shine and texture in hair care products. It also reduces the greasiness of natural oils. it is free from solvents or petrochemicals of any kind. Non toxic to humans and the environment. All the sensory benefits of silicones, without the health and ecological risks.
Dehydroacetic Acid	Dehydroacetic Acid	Effective alternative to parabens.	Not animal tested. Eco-certified (classified as ecologically friendly raw material based on EU regulations).
Disodium Coco-glucoside Citrate	Disodium Coco-glucoside Citrate	Coconut, glucose and corn-derived ultra-mild surfactant system.	Interacts with water to create bubbles to wash away dirt and oil from hair and skin.
Edelweiss	Leontopodium Alpinum (Edelweiss) Meristem Cell Culture	Plant stem cells contribute to the growth and repair process. They contain the highest concentration of antioxidants (active substances/phenylpropanoids) and allow for the generation of new tissues and continuous growth. Extracts prepared from plant stem cells guarantee the highest quality, activity and purity for ingredients without the worry of weather, soil, herbicides, pesticides, fungicides, fertilizers, insect infection and other pollutants in the environment.	A proprietary process allowing for the selection of these plant stem cells in the lab without the use of soil contain at least 1,000 times the active antioxidant molecule concentrations as plants grown through conventional farming methods. Edelweiss visibly reduces wrinkle depth after 20 days of use. Rich in caffeic acid derivatives, these stem cells offer antioxidant cellular support. After 40 days of use, studies show an improvement in all attributes of the skin as it relates to hydration, luminosity and softness. Emollient to hair and skin.
Ethyl Palmate	Ethyl Palmate	Highly stable triglyceride from	

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
		palm.	Maintains moisture.
Geranium	Pelargonium Graveolens		Properties: Insect repellent, General tonic, Fungicide, Stops bleeding, Stimulates liver and pancreas, Perceived differently by individuals—it can be calming or stimulating.
Gluconolactone	Gluconolactone	A natural substance derived from gluconic acid	The "water hungry" molecules pull moisture out of the air and allow it to be absorbed by the skin. By drawing water droplets in it helps to soften and soothe dry skin and replenish lost moisture. In addition it helps form a barrier on the skin, preventing moisture already present in the tissue from evaporating.
Glycerin	Glycerin	Extremely versatile, sweet-tasting, used in cooking as well as the formulation of cosmetics.	Acts as a humectant for both skin and hair. Potent moisturizer, helps to protect against dryness in skin and frizz in hair.
Glyceryl Oleate	Glyceryl Oleate	Sunflower oil, coconut and palm plant based modified oil.	Balances cleansing of oils from hair and scalp.
Glyceryl Stearate	Glyceryl Stearate	Sourced from Coconut Palm.	Emollient to both skin and hair. Maintains moisture balance.
Glycine	Glycine	Glycine accounts for about one third of the amino acids which make up human skin collagen and is also in hair. Often made from the soybean.	Provides skin and hair nourishment, conditioning and damage recovery affects.
Green (Chlorella Vulgaris) & Brown (Laminara Digitata) Algae Complex	Glycerin (and) Hydrolyzed Algin (and) Sea Water (and) Chlorella Vulgaris	Spherical shaped single-cell algae is combined with Brown Algae.	Delivers ultra hydration and helps boost skin's natural protective barrier. Chlorella is also very high in protein, minerals and fiber and used in many food supplements for its internal "super-food" benefits.
Green Tea	Camellia Sinensis (Green Tea) Leaf Extract	Antioxidant-rich, time-honored ingredient. Contains the amino acid Theanine, an anti-aging powerhouse.	Soothes and calms skin. Leaves hair looking shiny and moisturized.
Guar Gum	Cyamopsis	High-fiber powder that comes	Helps to create a thick

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
Guar Hydroxypropyl-trimonium Chloride	Tetragonoloba (Guar) Guar Chloride Hydroxypropyltrimonium	from the grinding of guar beans. Plant-based gum used to help thicken formula and increase viscosity.	cream formula. Is both nourishing and conditioning to hair and skin; optimized for use in detangling and giving the hair body and shine.
Jojoba Beads	Jojoba Esters	A white crystalline wax derived from jojoba esters.	This waxy ester helps reduce flakiness and increase firmness. This our gentle exfoliant in our Micro Polish.
Jojoba Oil	Simmondsia Chinensis (Jojoba Oil)	Expressed from the seed of the Jojoba plant, this liquid wax is similar in structure to sebum produced by human skin, making it great to use on the entire body.	Used for smoothing and conditioning hair. Also provides heat protection. On the skin, it provides an excellent, non-greasy feel that hydrates and conditions.
Kukui Oil	Aleurites Moluccana (Kukui) Seed Oil	Expressed from the tree nut, it is light yellow with an amber tint. Kukui seed oil has no known toxicity and is a non-irritant, even to the eyes.	The oil penetrates skin deeply to hydrate and soften and is an excellent botanical source of fatty acids and antioxidants, as well as Vitamins A,C and E. Great for scalp and hair nourishment.
Larch Tree	Galactoarabian	This is a highly functional polysaccharide extracted from already-harvested North American Larch trees which grow in abundance in the Northwest United States. It's bio-available, so has a highly beneficial interaction with skin cells, and is biodegradable.	This patent pending technology has natural film forming properties to assist with style memory. In skin it works to enhance the skin's moisture barrier function.
Lauryl Glucoside	Lauryl Glucoside	A gentle plant based surfactant derived from coconut that is biodegradable.	This mild, non-irritating, all natural, plant based surfactant is used in place of the known irritant Sodium Lauryl Sulfate/Sodium Laureth Sulfate (SLS).
Lecithin (soy)	Lecithin	Plant source of Lecithin which is mechanically extracted.	It acts as an organic emulsifier in both food and cosmetic applications. Used for smoothing both hair and skin – leaves them feeling soft and conditioned.
Lemongrass	Cymbopogon		Properties:

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
	Schoenanthus		Insect repellent, Antiviral, Sedative, Anti-inflammatory.
Lemon Juice Extract	Citrus Medica Limonum (Lemon) Juice Extract	From the small evergreen tree. The fruit is used for culinary and non-culinary purposes. It is a natural pH adjuster and helps keep the vibrancy of the colors in the gloss.	Contains astringents and enzymes that have an antiseptic and toning effect, provides flavor.
Linden Flower Extract	Tilia Cordata (Linden) Flower Extract	Tilia Cordata is a extract derived from the blossoms of the Linden tree, which is native to Europe and western Asia.	Rich in flavonoids, it is a potent antioxidant known to help calm and soothe skin.
Linseed Oil	Linum Usitatissimum (Linseed) Seed Oil	Expressed from the oil-rich seeds of the flax flower. Nutritionally, extremely high in omega-3 fatty acids, B vitamins, potassium, lecithin, magnesium, fiber, protein and zinc.	As it dries, it forms a shiny surface on hair. Helps skin to retain moisture and protects delicate oil layer on skin.
Macadamia Seed Oil	Macadamia Ternifolia (Macadamia) Seed Oil	Oil which comes from the pressing of several varieties of Macadamia nuts. Contains antioxidants, phytochemicals, protein, vitamins and beneficial fatty acids.	Used as an emollient in skin and hair. Smoothes, hydrates and restores.
Maltodextrin	Maltodextrin	Polysaccharide derived from starches (commonly wheat). Used in food as a flavorless/slightly sweet additive.	Creates a moisture barrier in both skin and hair. Provides energy to cells in the form of glucose when digested.
Marigold Flower Extract	Calendula Officinalis (Marigold) Flower Extract	Marigold florets are considered edible. They are often used to add color to salads, or added to dishes as a garnish and in lieu of saffron.	Rich in vitamin A, it helps to soothe, heal, and restore skin.
Marine Sugar Algae Complex (Laminara Digitata)	Hydrolyzed Algin (and) Zinc Sulfate	A concentrated solution of an oligosaccharide from this leathery, dark brown seaweed that grows to two or three meters combined with zinc.	Improves clarity, cellular renewal and helps purify while providing oil control.
Mauritia Flexuosa (Buriti) Fruit Oil	Mauritia Flexuosa (Buriti) Fruit Oil	Certified organic oil extracted from the Buriti Fruit. Rich in carotenoids and provitamin A.	Beneficial to both skin and hair – uses antioxidants to inhibit free radicals. Nourishing and anti-aging.
Menthol	Menthol	Derived from the oil of the peppermint plant.	Stimulating, strengthening, digestive aid, effective for irritable colon, general tonic, antiseptic, liver and kidney tonic; repels rodents, insect repellent.

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
Milk Protein	Hydrolyzed Milk Protein	Complex organic milk-based protein which has been enzymatically cut into smaller protein pieces. High in nutrients.	Film-forming agent that assists in both antistatic and curl/style retention on hair. Adds moisture.
Murumuru Seed Butter	Astrocaryum Murumuru Seed Butter	A non-fragrant vegetable fat that's nearly solid at room temperature and is from the Brazilian Amazon Tree's edible fruit seeds.	Brings a natural gloss to dry, damaged hair.
Naturally Occuring Component of Essential Oil Blend	Benzyl Benzoate, Citral, Citronellol, Eugenol, Farnesol, Geraniol, Isoeugenol, Limonene, Linalool	These are fragrance components. They are naturally occurring components of organic essential oils. They cannot be separated from the essential oils, and are not added to the formula separately.	Distribution in the EU requires that these components of organic essential oils be called out on ingredient lists.
Oatmeal	Colloidal Oatmeal	Produced from the pressing and boiling of the dehulled oat grain. Has a high concentration of starches, proteins, glucans and saponins.	Extremely high affinity for water gives skin and hair a high level of moisturization. Applied to skin for centuries to relieve itching, irritation and inflammation.
Olive Oil	Olea Europaea (Olive) Fruit Oil	Comes from the pressing of olives. High in antioxidants and vitamin E.	Extremely beneficial to the body, both topically and internally. Smooths the hair cuticle and softens hair.
Orange Peel	Citrus Aurantium Dulcis (Orange) Peel	Orange trees are widely cultivated in tropical and subtropical climates for the delicious sweet fruit, which is peeled or cut (to avoid the bitter rind) and eaten whole or processed to extract orange juice, and also for the fragrant peel. The peel of the fruit picked at its ripe stage and then dried.	Provides skin and hair conditioning properties. Also used for fragrance and flavor.
Palm Kernal Oil	Argania Spinosa (Argan) Kernel Oil	Oil produced from the crushing of the kernels of the argan tree fruit. Contains more than 70% Oleic and linoleic acids. Rich in Vitamin E, phenols and carotenes.	Protects skin and hair from dryness – essential fatty acids provide nutrition to the body. Some research indicates it may be a treatment for psoriasis and may reduce sebum production on skin.
Palm Kernel Oil	Elaeis Guaneesis (Palm) Kernel Oil	Edible, emollient oil comes from the pulp of the palm fruit. High in the antioxidant beta-carotene and saturated fatty acids. This certified organic material is sustainably sourced and harvested.	Aids in the healing process of the skin, and leaves hair feeling thick and conditioned.

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
Pennywort	Centella Asiatica (Pennywort) Meristem Cell Culture	Plant stem cells contribute to the growth and repair process. They contain the highest concentration of antioxidants (active substances/phenylpropanoids) and allow for the generation of new tissues and continuous growth. Extracts prepared from plant stem cells guarantee the highest quality, activity and purity for ingredients without the worry of weather, soil, herbicides, pesticides, fungicides, fertilizers, insect infection and other pollutants in the environment.	A proprietary process allowing for the selection of these plant stem cells in the lab without the use of soil contain at least 1,000 times the active antioxidant molecule concentrations as plants grown through conventional farming methods. Pennywort increases skin hydration and elasticity.
Pentaclethra Macroloba Seed Oil	Pentaclethra Macroloba Seed Oil	Conditioning for both skin and hair. Antioxidant oil extracted from the seeds of Amazonian plant and used to protect from environmental aggressors.	Gives hair silky-smooth feel, increases combability and shine.
Peppermint	Mentha Piperita		Properties: Insect repellent, Stimulating, Strengthening, Aides in motion sickness and general nausea, Effective for irritable colon.General tonic.
Pineapple Fruit Extract	Ananas Sativus (Pineapple) Fruit Extract	Water-based extract from pineapple. High in manganese and vitamin C.	Helps to close hair cuticle and condition hair, creating shiny, sleek, smooth hair.
Pumpkin Seed Meal	Cucurbita Pepo (Pumpkin) Seed	Intellimmune Seed Meal Complex – the perfect companion to the antioxidants found in the Intellimmune Seed Oil Complex. After the oil has been cold-pressed from the seeds, the water-soluble antioxidants (like polyphenols and flavonoids) are infused into this formula.	Protects against environmental aggressors. Provides nourishment to all types of hair and skin. Topical application of both oil and water antioxidants is overwhelmingly beneficial to skin.
Pullulan (and) Sorbitol (and) Trehalose (and) Acacia Senegal Gum	Pullulan (and) Sorbitol (and) Trehalose (and) Acacia Senegal Gum	Sugar based natural film former.	Provides a shiny, transparent and flexible film former ideal to deliver structure and hold in styling products.
Pumpkin Seed Oil	Cucurbita Pepo (Pumpkin) Seed Oil	Intellimmune Seed Oil Complex – a powerful blend of high antioxidant oils.	Protects against environmental aggressors. Provides nourishment to all types of hair and skin.
Purple Maize	Zea Mays (Purple Corn)	Purple corn is fast approaching	A powerful antioxidant and

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
	Kernel Extract	classification as a functional food—an integral component of the diet that provides energy and essential nutrients.	an alternative to synthetic food dyes that contains anthocyanins. Anthocyanins are responsible for the purple, violet and red colors.
Quinoa	Chenopodium Quinoa Seed	Cultivated as a cereal for thousands of years, it is nutritionally complete. The seed contains protein, fiber and other nutrients including iron, calcium and B vitamins.	Film-former which helps to strengthen hair and create a smooth, conditioned feel on skin. Beneficial nutrients and antioxidants help to protect skin.
Radish Root Extract	Raphanus Sativus (Radish) Root Extract	Derived from an edible root vegetable. Radishes have numerous varieties, varying in size and color (red, white, pink, purple and black).	Vibrant in color and rich with antioxidants, ascorbic acid, folic acid and potassium. A good source of vitamin B6, riboflavin, magnesium, copper, and calcium.
Red Grape Seed Oil	Vitis Vinifera (Red Grape) Seed Oil	Intellimune Seed Oil Complex – a powerful blend of high antioxidant oils.	Protects against environmental aggressors. Provides nourishment to all types of hair and skin.
Red Raspberry Seed Oil	RubusIdaeus (Red Raspberry) Seed	Intellimune Seed Meal Complex – the perfect companion to the antioxidants found in the Intellimune Seed Oil Complex. After the oil has been cold pressed from the seeds, the water-soluble antioxidants (like polyphenols and flavonoids) are infused into this formula.	Protects against environmental aggressors. Provides nourishment to all types of hair and skin. Topical application of both oil and water antioxidants is overwhelmingly beneficial to skin.
Rice Bran	Oryza Sativa (Rice) Bran Extract	Extract from rice. Commonly used as both a food additive and a food supplement.	Holds water to aid in moisturization of both skin and hair. Assists in conditioning and smoothing.
Rose Flower	Rosa Damascena Flower	Rose petals picked for distillation are picked manually, day by day, at or just before sunrise.	Rich in color and provides skin-conditioning properties. The American Botanical Council reports that rose petals have sedative, antiseptic, anti-parasitic, anti-inflammatory, laxative, cholesterol-lowering and heart-supportive properties.
Rose water	Rosa Damascena Water	Distilled from rose petals, this	Can help in reducing

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
		water contains all of the plant's water-soluble, healing components, including a low level of essential oil.	redness from irritated or over-heated skin. It is also a great cleanser with astringent like properties helping to close open pores. The aroma is a powerful mood enhancer that calms feelings of anxiety and promotes emotional wellbeing.
Rosehip Seed Oil	Rosa Moschata (Rosehip) Seed Oil Rosa Rubignosa (Rosehip) Seed Oil	The rosehip is the bulbous part at the base of the flower, which remains after the rose petals are removed. The seeds inside are pressed and the oil is extracted.	Rich in vitamins A and E and essential fatty acids. Includes the omega-6 fatty acid known as linoleic acid, which plays an important part in the structure of cell membranes. Provides oleic acid, which is an omega-9 fatty acid that keeps skin moist and supple and in optimum condition. Contains beta-carotene, vitamin A and vitamin C, antioxidants that help to protect against free radical damage and aids the formation of collagen.
Safflower Seed Oil	Carthamus Tinctorius (Safflower) Seed Oil	A flavorless and colorless oil from the safflower seed, high in monounsaturated fatty acid	Light oil easily absorbs into the hair and skin, providing nourishment. Hydrates the scalp and hair.
Sesame Seed Oil	Sesame Indicum (Sesame) Seed Oil	Oil produced in the squeezing of sesame seeds. Easily penetrates into the skin and aids in cell growth regulation.	High in antioxidant content, it has been consumed for centuries for strength, energy, youth and beauty.
Shea Butter	Butrospermum Parkii (Shea Butter)	Seed of the shea tree crushed and boiled to release the natural fats. High in vitamins A, E and F. Solid at room temperature but liquifies at body temperature.	Provides slip. Also aids in protecting against dry skin and scalp, helps to restore elasticity to skin.
Soap Bark	Quillaja Saponaria Extract	Derived from the evergreen tree family, this raw material produces a foaming element when mixed with water.	This raw material replaces synthetic foaming agents. It has historical medicinal use with the Andean people and today is often used in soft drinks.
Sodium Benzoate	Sodium Benzoate	A type of salt often used as a preservative.	Prevents mold and other microbial growth.
Sodium Cocoyl Glutamate	Sodium Cocoyl Glutamate	Mild foaming surfactant sourced from palm and coconut.	Creates foam which helps to solubilize oils from hair and skin so they can be rinsed away.
Sodium Hydroxide	Sodium Hydroxide	Sodium hydroxide is the strong	Soap is not found in

Ingredients	Inci Name	Function (What it is)	Benefit (What it does)
		alkali used to saponify the organic oil (fatty acid) to make it a soap or of a soap-like quality.	nature; but it can be created by very simple processes. In this way it is similar to bread, wine, glass, cheese, and pottery, other useful items produced by early peoples most likely by accident at first then by design. Other uses include washing of fruits and vegetables, chocolate and cocoa processing, caramel coloring production, soft drink processing and thickening ice cream.
Sodium Methyl Cocoyl Taurate	Sodium Methyl Cocoyl Taurate	Coconut-derived, ultra-mild surfactant system.	Interacts with water to create bubbles to wash away dirt and oil from hair and skin.
Sodium Stearoyl Lactylate	Sodium Stearoyl Lactylate	Lactic acid-derived emulsifier used in many types of food including baked goods, desserts and powdered beverage mixes.	Humectant for both skin and hair.
Soybean Oil	Glycine Soja		Properties: Insect repellent, High source of skin-conditioning vitamin E, Suitable for all skin types.
Soybean Seed Extract	Soja (Soybean) Seed Extract	Approximately 85% of the world's soybean crop is processed into soybean meal and vegetable oil. The extract	Helps smooth, aids in wound healing, stimulates elastin and collagen synthesis and increases oxygen in tissues.
